◆ About Me

Turning complex problems into simple design

20+

Personal &
Academic Projects

1+

Year of Practical
Programming
Experience

Motivated Junior
Developer

I turn complex problems into simple and efficient designs by focusing on clarity, usability, and real project requirements. My goal is to deliver solutions that not only work well, but are easy to understand and maintain. [next question](#)

- Understanding your requirements
- Proposing the best technical solution
- Development & regular updates
- Testing & final delivery

1. Website Design and Development

- Modern and attractive User Interface (UI) design
- Strong focus on User Experience (UX)
- Fully responsive design (mobile, tablet, and desktop)
- Custom development with dedicated coding

Creating a beautiful, fast, and highly functional website

2. Basic SEO and Optimization

- Implementation of basic technical SEO (site speed, page structure, clean URLs)
- Optimization for Google search engine
- Applying essential content and on-page SEO principles

Building a website with strong potential for growth in Google rankings

3. Security, Support, and Maintenance

- Ensuring website security
- Regular data backups
- System and plugin updates

Fixing bugs and resolving technical issues

4. Client Training and Consultation

- Training on how to use the website management panel
- Consultation on content creation and page structure
- Guidance for future website development and expansion

Allowing clients to manage and update website content independently, without the need for a developer

✦ Resume

Education and practical experience

A summary of my education and practical experience, where I've built a strong foundation in programming concepts and applied them through real projects to solve practical problems.

My education

2023 - 2025	Associate Degree in Software Engineering (Specialized)	- Focused on practical web development and project-based learning alongside academic studies.
2023 - 2020	Technical Background & Interests	- Developed strong interest in computers, AutoCAD, web design, and C# programming through technical education.

Work experience

2025	Junior Web Developer	- Worked on real-world web projects with a focus on hands-on development.
2026	Freelance Web Designer & Developer	- Designing and developing websites collaboratively on a freelance and project basis.

Developer Meetup

2024 - 2026

Active in niche groups

CodeCupies

CodeCup was a community where my path became clear, and I was able to grow in my field of interest with the support of experienced and like-minded people. Many thanks to my friends at CodeCupies.
